

MD5算法实现

- Name: Zhang Qi
- ID: 17343153
- Email: zhangq295@mail2.sysu.edu.cn

Enviorment

- Ubuntu 18.04
- g++ 7.4.0

How to run

```
# Firstly, u should change the path to current floder
$ make
$ ./main
```

Note

- The screenshots of the result are saved in floder `ans_img`.
- You can change the input message in the `main.cpp`.
- Plz don't change the floder structure.
- If the program doesn't work, plz send me an email and I'll repair it asap. Thank u!
