Folder structure

```
.
|----CER                #文件夹，存放用于测试的x509证书
|
|----img                #文件夹，存放实验结果截图
|
|----src                #文件夹，存放程序代码
|      |----ans.cpp
|      |----ans.hpp
|      |----main.cpp
|
|----main                #Linux下可执行文件
|
|----Makefile
|
|----Readme.md           #Readme
|----Readme.pdf
|
|----Report.md           #实验报告
|----Report.pdf
```

Enviornment

- Ubuntu 18.04LST
- g++ 7.4.0

How to run

```
$ make
$ ./main
```

Note

- Plz don't change the floder structure or it will cause the unpredictable errors.
- You can change the certificate for program in `main.cpp`.
- If the program doesn't work, plz send me an e-mail and I'll repair it asap. Thank u!
